Dear Harv,

Just a quick note to let you know how happy I am with the way my home has turned out. Your expertise and knowledge in log construction was invaluable.

I was particularly impressed with your ability to do much of the "custom" work on site. I realize my house plans incorporated several elements which didn't necessarily lend themselves well to log construction but because of your skill in log working the final product turned out even better than I had hoped. The workmanship and hand crafting that you put into the log work has made the difference between "just another log house" and a home that is truly unique. The end result is a home in which I am proud to entertain friends and business associates. The house is still not fully finished and I've already had a number of people tell me they want to buy it if I'm ever interested in selling (which I'm not!).

Harv, I also appreciate your knowledge and guidance in recommending a company to produce the logs. Mountain Logs, of Hamilton, Montana, was wonderful to work with. Without your help, I'm sure I wouldn't have found a company that provided such a quality product at a fair price.

Again, thanks for all the work you put into my house. I'd be happy to recommend you to anyone considering building a log home.

Best Regards,
